Furniture Sale

The A-1 Furniture Depot is having a week-long sale on living room furniture. Use the information from the flyer to answer the questions below.

Furniture Sale	
Recliner chair:	\$399
Sectional sofa:	\$789
Table lamps (pair):	\$139
End table:	\$125

1. Marisa wants to buy a new sectional sofa and some table lamps. She has \$950 to spend. Can she buy both items? Use estimation to explain your answer.

2. Gary has \$600, and he wants to buy two end tables and a recliner chair. Does he have enough money? Explain your answer.

3. Nisha has \$400 to spend. She found a large area rug for \$175 and a floor lamp for \$69. Does she have enough money to buy an end table? Explain how you solved this problem.

4. Explain why it is better to round to the nearest ten than to the nearest hundred when estimating the cost of some of the furniture items.
